

Have you got  
a **physics**  
degree?  
Find out more.

#### Junior data scientist

Contributes to the development of advanced analytics and data modelling to support business innovations within Eni's Digital Transformation strategic program. Also identifies suitable models and algorithms to be trained by exploiting techniques of Big Data Analytics, Machine and Deep Learning, Advanced Simulation. Plays a key role in the development of an increasingly innovative reality.

#### Junior data analyst

Is responsible for gathering as well as analyzing functional requirements for the development of new business intelligence systems. Also provides support to the business in data model definition and dashboard design and collaborates with internal technical teams in incident resolution. Shares their expertise with a view to personal enhancement and professional growth.

#### Junior R&D analyst

Designs, plans and follows the testing activities within Eni projects in collaboration with the internal and external multidisciplinary work team. Also assists in the drafting of technical documentation and project specifications in collaboration with national and international laboratories and research bodies: contexts where multiculturalism is favored and recognized as an essential value.

#### Junior renewable energy analyst

Actively participates in research teams for the development of innovative projects in the field of renewable energy, interfacing with the laboratory team. Is involved in the processes for the production of energy carriers, with reference to the aspects related to the efficient use of fossil fuels, energy saving and the use of renewable energies. Their professional context of reference is challenging and constantly evolving.

#### Research laboratory analyst

Is in charge of implementing actions for the development of methodologies of experimental characterization of a physical and rheological nature existing at the reference laboratory or new, as the need arises. Dynamism and ability to collaborate in interdisciplinary teams are fundamental skills.

#### Pricing specialist

Defines the price for the supply of gas in the European markets in which Eni operates and provides support in the definition of contracts. In compliance with company policies, they provide prices to customers who request exchange transactions and complete their formalization. Works in challenging contexts, which allows them to get involved with commitment and passion.
