

Stetel - Passion for mobile

Stetel Srl
Ver. 1.0 – 20/10/2021

Stetel Background

The idea

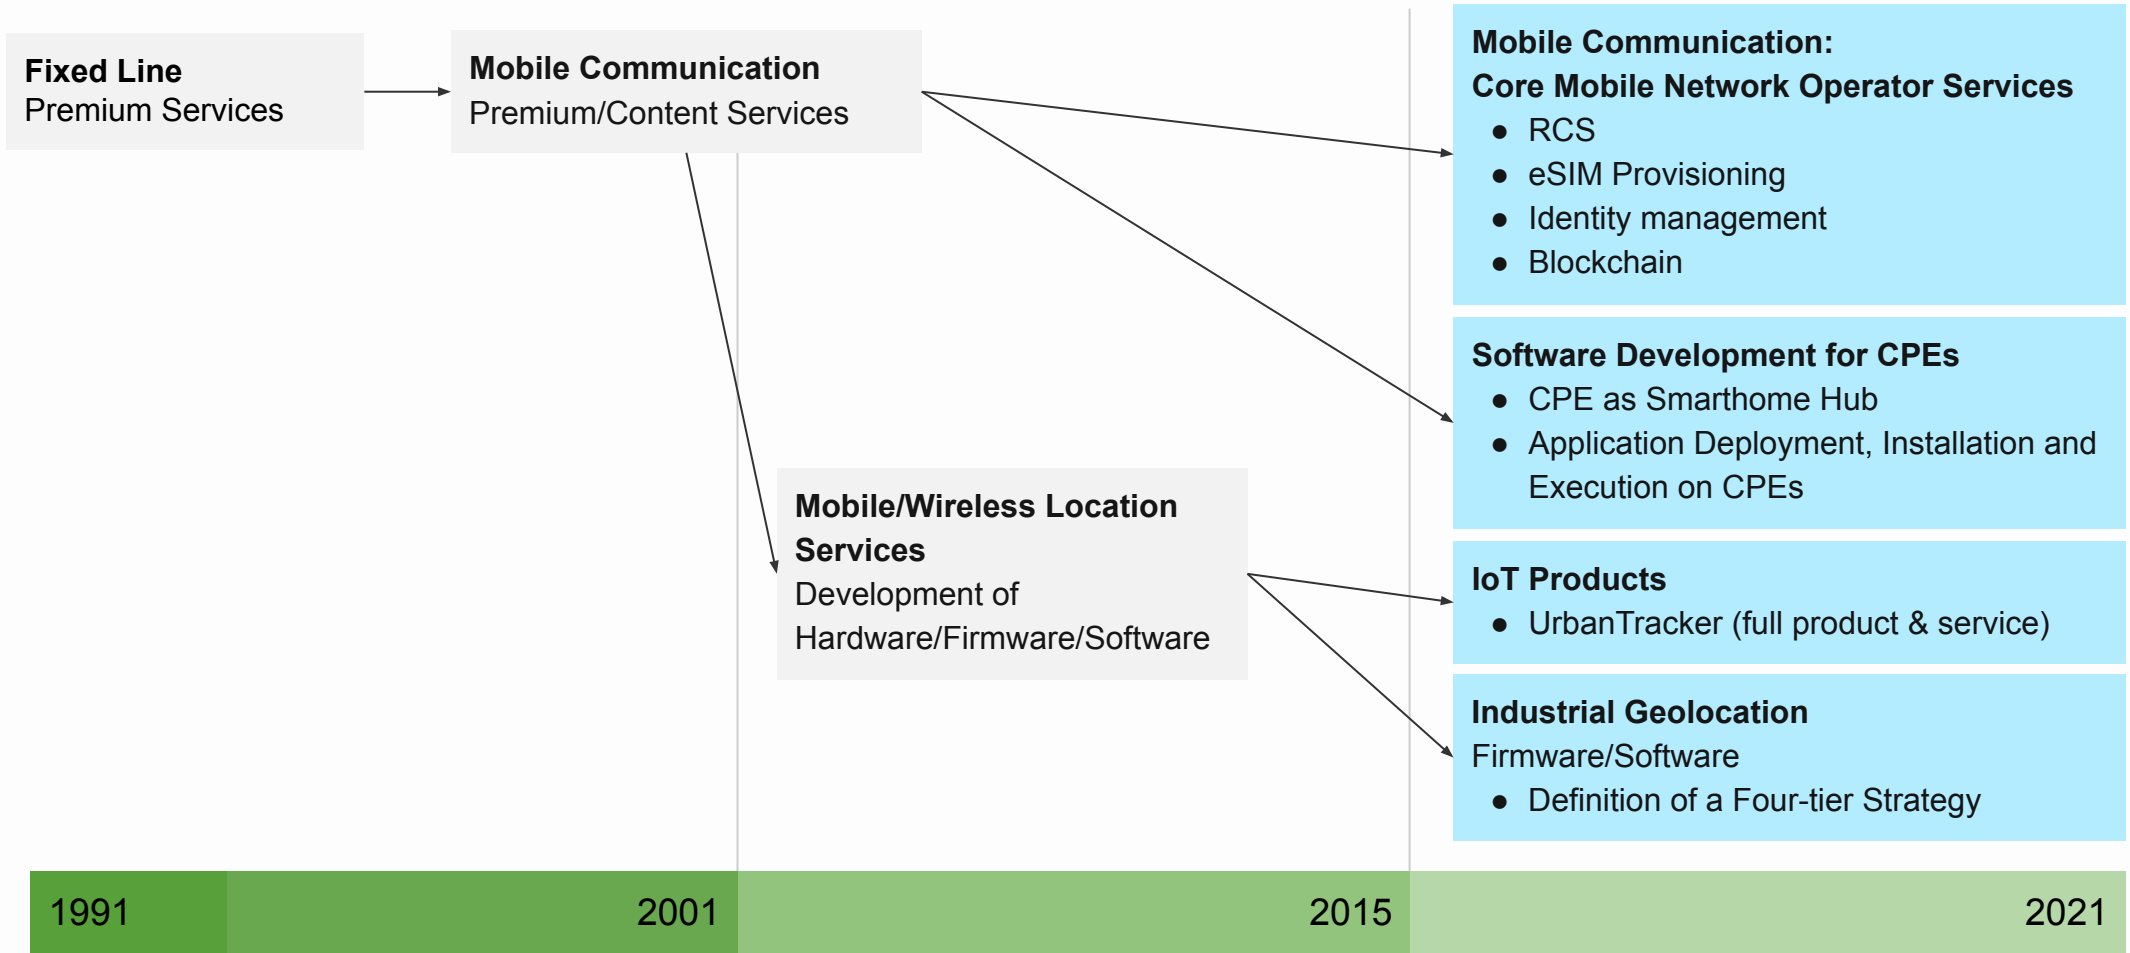

The original idea that led to the creation of Stetel was to leverage the availability of new communication technologies to support the growth of people's needs for communicating. In Stetel, we supported that need with a genuine focus on aligning the customer experience to new developing social contexts.

Our Mission

We want to live the challenges of the third millennium as protagonists, by offering to our customers and partners an agile and dynamic model to embrace innovation where it offers material improvement to industrial and commercial competitiveness. Our ambition is to support corporates and public institutions in anticipating the adoption of new ICT technologies, leveraging our ability to attract and train the best professional skills of the sector.

That is, and has been, our call to action during the past 30 years.

The team

Stefano Marchi

CEO and founder

Stefano has primary academic history as Pharmacologist, including seven-year research experience with long time spent at Oklahoma University. Back in Italy Stefano spotted immediately the opportunities made available by the fast evolution of Communication Technologies and the benefit they offer to day-to-day life. He then created Stetel as the vehicle to realise his vision. Stefano is Stetel's CEO since its foundation.

Georg Campana

CTO

Recognized as the real technical soul of Stetel, Georg has started his career as developer and is today driving the technical design and implementation of Stetel's projects and services with the role of CTO. With one hand on the delivery and one on the investigation of new technologies, Georg is contributing to the success of Stetel from the year 2000. Mobile technologies and IoT are his preferred playgrounds.
